Top Choices

High-Pressure Laminate with Colored T-Molding

Our high-pressure laminate tops with a substrate of particle board core have a 5mm radiused edge T-Molding. There are 12 colors of T-Molding and 14 colors of high-pressure laminate to choose from allowing for pops of color in the classroom and endless color palette ideas. For our particle board core desktops, we have designed an integrated X pattern support frame that fits flush to the bottom of the desk and is secured alongside each leg assembly. This integrated frame offers reinforced strength and quality and is pre-installed by CEF to help save time on installation.

*pre-drilled holes for book box shown

High-Pressure Laminate on Baltic Birch

Our high-pressure laminate tops with a substrate of Baltic birch requires no T-molding or edge banding. The edge is exposed layers of wood that are sealed with a conversion varnish, providing a smooth durable satin finish, which offers beautiful aesthetics and a seamless edge around the desktop. Durability with texture that creates a warm environment. There are 14 colors of high-pressure laminate to choose from.

FENIX® Innovative Materials on Baltic Birch

Award-winning Fenix offers premium smart innovative material. Our Fenix Tops with a substrate of Baltic birch requires no T-Molding or edge banding. The edge is exposed layers of wood that are sealed with a conversion varnish, providing a smooth durable satin finish, which offers beautiful aesthetics and a seamless edge around the desktop. Durability with texture that creates a warm environment. Fenix Innovative Surfacing is a soft to the touch, anti-fingerprint, ultra-matte surface. Its premium make up creates a surface that is highly resistant to scratches, abrasion, and repeated cleaning. This smart material also boasts thermal healing of superficial micro-scratches.
